PRODUCT

Emulsificabile concentrate insecticide-acaricide.
[Registration of Italian Ministry of Health No. 20176](#)

COMPOSITION

Tetramethrin	3.0 g
Permethrin 25/75	6.0 g
Piperonyl butoxide	6.0 g
Formulates sufficient quantity for	100 g

ACTIVITY & CHARACTERISTICS

Duracid Combi is an emulsifiable concentrate insecticide-acaricide, based on solvents with a low impact for the environment. The product has a dual action: high immediate knockdown effect, due to the presence of the free Tetramethrin, and long lasting residual action of the Permethrin. Both active principles are synergized by the PBO (Piperonyl butoxide) that: facilitates the assimilation by the target insects, reduces the resistances and boosts the effect. Treatments with **Duracid Combi** guaranteed environments free from insects for at least 2 weeks.

Duracid Combi is effective against flying (flies, horse flies, wasps, common mosquitoes and tiger mosquitoes, sand flies, midges) and crawling insects (cockroaches, ants, fleas and bugs), insects infesting warehouses (moths, grain weevils and tribolium) and other pest and occasional invaders (spiders, ticks, bird lice, alfitobio, bedbugs).

Duracid Combi is effective against all types of insects that commonly invade the domestic, civil, industrial and zootechnical environments, such as: homes, food industries, milking halls, warehouses, schools, hospitals, cinemas, shops, barracks, hotels, restaurants, canteens, tourist centres, coastal resorts, camp sites, means of transport, rural environment, stables, animal shelters, dung heaps, waste deposits. The product is also recommended to treat green areas such as tree-lined streets, hedges, lawns and ornamental bushes for mosquito control only.

METHODS AND DOSAGES FOR USE

Duracid Combi can be diluted in water for use inside buildings, in external areas or areas with vegetation, using pressurised pumps, electric or motorised sprays and atomisers.

Pests	Dilution with water
Mosquitoes (<i>Culex, Aedes, Culiseta, Anopheles, etc.</i>)	0,5-1,0 % of Duracid Combi
Flies and other flying insects	1,0-2,0 % of Duracid Combi
Crawling insects	2,0-3,0 % of Duracid Combi

For higher infestations or resistant insects, increase the dosage. Treat a surface of 15-25 m² with 1 litre of solution. Use more water in case of absorbent surfaces, like rough walls.

WARNINGS

Do not contaminate food, drink or their containers during use. Avoid breathing spray and wash your hands if they have insecticide liquid on them. Do not use in concentrated form: follow the manufacturer indications. Do not nebulize in the environment. Do not apply directly on animals. Do not use in agriculture. Keep away animals during the treatment.

HAZARD STATEMENTS

H317 May cause an allergic skin reaction.

H410 Very toxic to aquatic life with long-lasting effects.

PRECAUTIONARY STATEMENTS

P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children.

P103 Read label before use.

P273 Avoid release to the environment.

P280 Wear eye protection.

P302+ 352 IF ON SKIN: Wash with plenty of water and soap.

P391 Collect spillage.

P501 Dispose of contents/container in accordance with regulation.
